

Module 2.7 Clinical Summary

2.7 Clinical Summary

Product Name: Cardiotat 10 mg film-coated tablets

2.7.3 Summary of Clinical Efficacy

Study ID: CSR-CARDIO-101

The primary efficacy endpoint in the clinical summary is reduction in systolic blood pressure from baseline to Week 12.

The study population included adult patients with mild to moderate hypertension.

The clinical summary states that the treatment demonstrated clinically meaningful reduction in blood pressure.

2.7.4 Summary of Clinical Safety

The clinical summary reports 3 serious adverse events during the treatment period.

No deaths were reported.

Reviewer Note:

The Clinical Summary should be consistent with the full Clinical Study Report in Module 5.
